

UV INSECT LIGHT TRAPS

MATRIX FOUR SEASONS LIGHT TRAP

Introducing the first all season light trap. The first true flexible light trap designed to handle all different levels of fly problems.

Either configuration contains:

- » 25-50-75-100 watts of UV light
- » 2 glueboard configuration
- » Attracts insects from two sides
- » Most powerful trap available
- » Available in white or black
- » Mount on wall, or hang using concealed handles
- » Shatterproof bulbs available
- » Dimensions: 21" x 14" x 5"

The Matrix Four Seasons is the first insect light trap to give you the power to configure it instantly for changing fly infestation levels.

When fly pressures are low, remove 1, 2 or even 3 of the bulbs and conserve power. Keep the bulbs as spares. For sensitive environments such as hospital and nursing homes, use 1 bulb and the lower glue board.

Choice of operating at 25-50-75-100 watts and your choice of glue board positioning, upper, lower or both, you'll catch more flies and reduce service costs.

Configuration for high fly infestations:

- » 4 - 25 watt bulbs
- » Upper and lower glueboards
